

Characteristics:

Solution™ Vintage Puff is perfect for creating unique designs and graphics. Once heat applied, the media actually puffs to create a raised appearance. Use Vintage Puff in combination with any of our other Solution™ products to create exciting images and embossed effects especially popular in today's sports, leisure, urban and fashion retail markets.

Application Information:

100% cotton, cotton blends, 100% polyester, polyester blends

Printable Information:

Solvent and Eco Solvent inks

Availability:

61 cm width, 20 m length

Washability:

up to 40°C; Wash and iron garment inside out

Processing Instructions:

Do not mirror image. When printing, please pay attention that the paper faces down and ensure that the correct printing parameters are used and adjusted accordingly. The imprinted material has to repose for 4-6 hours if the cutting line lies inside of the motive. If the cutting line lies outside of the motive, the material has to repose only for 1-2 hours. Remove excess material and affix the application tape CAD-COLOR® Magic Mask® onto the material. In order to avoid bubbles between the motive and the carrier, we recommend to use a squeegee. Remove image from carrier, place on garment and heat apply as listed below:

Printing Parameters:

Always pre-heat garment before starting the heat application for 5 -10 seconds in order to remove possible moisture and / or chemical residue.

Temperature: 180°C
Time: 10 seconds
Pressure: firm
Remove Magic Mask®: hot

Accessories:

Teflon® cover sheet, Grip cover sheet, EZ Weeder™, CAD-COLOR® Magic Mask®
